

# LTPRSMHP3W-G | DATASHEET

## Tilting LED pattern projector 3W, green, 525 nm

### KEY ADVANTAGES

#### Scheimpflug tilt adjustment compatible with C-mount optics

Focus is maintained even when the pattern is tilted.

#### Light condenser focusing mechanism

For excellent optical coupling and light throughput.

#### Enhanced optical power

High numerical aperture condenser lens.

**LTPRSMHP3W series** re LED pattern projectors specifically designed for the most demanding 3D profiling and measurement applications. Triangulation techniques require that structured light is directed onto a sample at a considerable angle from vertical. Tilting the light source pattern becomes essential to ensure that the patterned light is properly focused across the entire sample surface.
